

PRECISION BALANCE

CUSTOM
SHARPENING SYSTEM

Precision Balance Custom Contouring and Sharpening is the perfect compliment to a Pro-Formance Advantage custom skate fit. All skate blades are not created equal. The blades of your new skates come with a stock radius and lie that should also be customized to best suit you and your game.

Precision Balance Custom Contouring

Precision Balance Contouring is a customized process of shaping the skate blade to best suit your body make-up and your game. A properly contoured skate will help you better transfer energy from the mechanical points of your feet directly to the skate blade thereby enhancing skating ability and reducing fatigue and potential for injury.

Precision Balance Sharpening

A quality, customized skate sharpening is crucial to skating performance at any level of play. Precision Balance ensures a quality sharpening every time. This customized system ensures that your edges are square; the Radius Of Hollow (ROH) is properly centered and ensures a high quality finish. Our Precision Balance skate technicians will work with you to customize your sharpening to best suit your game.

See our Precision Balance brochure or ask one of our Precision Balance skate technicians for more specific details on how Precision Balance Skate Contouring and Sharpening can improve your game.

At Source For Sports® we take great pride in enhancing your comfort and skating performance on the ice and we offer a Fit Guarantee to prove it. Ask one of our skate technicians about the Pro-Formance Advantage and Precision Balance systems and how we can help you improve your game.
